New Technology Reporting Overview

What is it?

A form that enables a contributor to report **new technology** to Caltech and NASA for possible patenting and licensing.

What defines new technology?

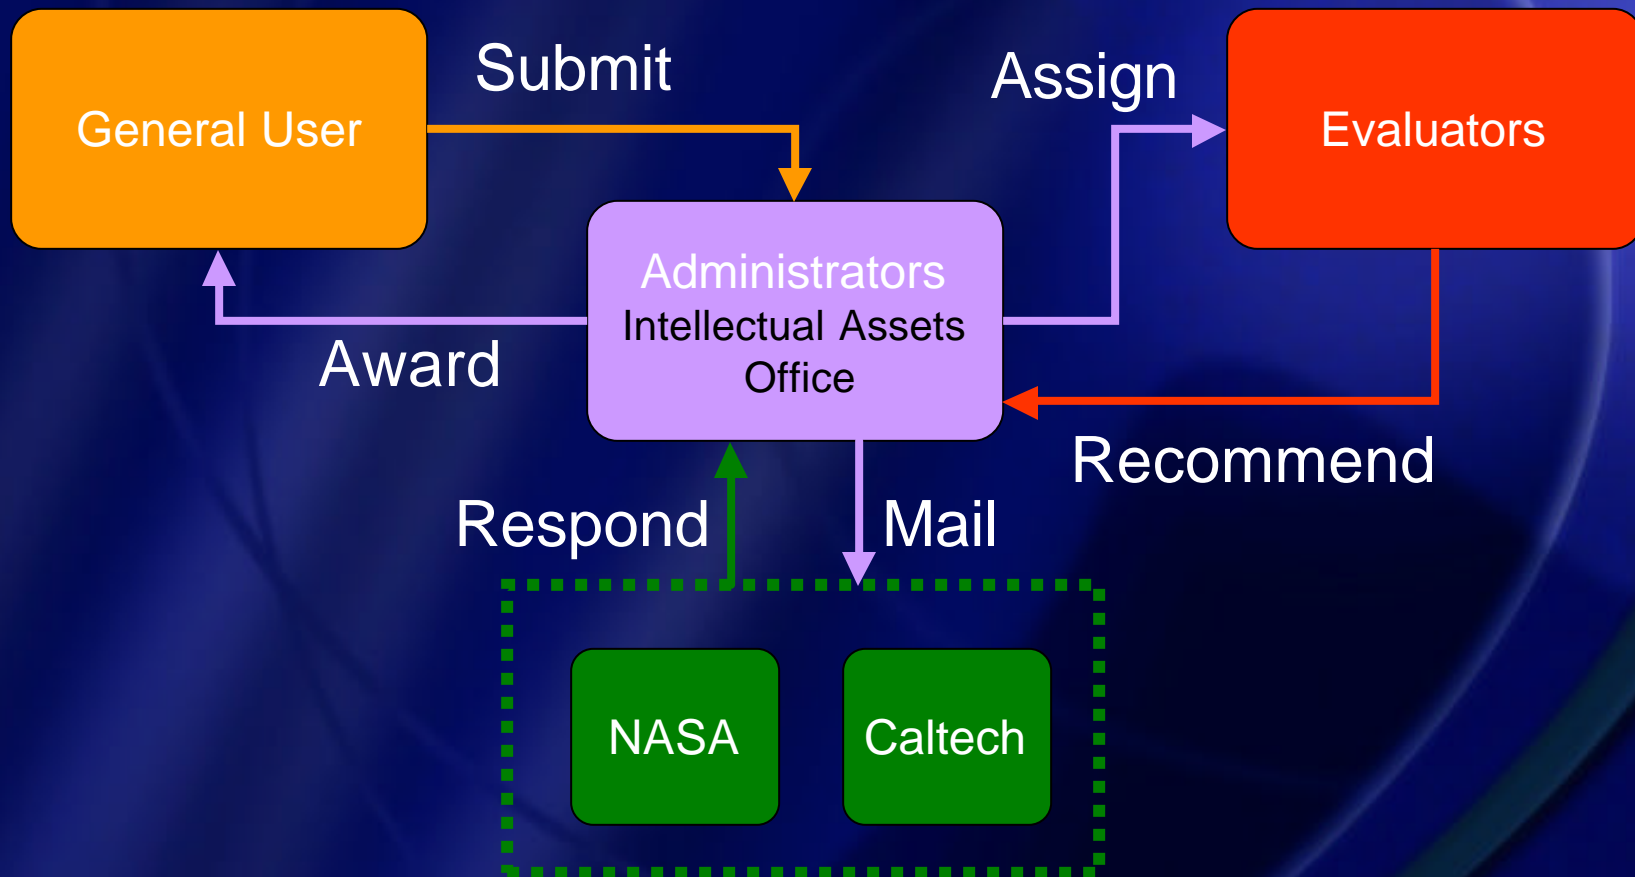

- Any activities involved in the creation of something new.
- Improvement of something which has already been developed.
- Formulation of a technology concept or application.
 - Transforming the concept into hardware or software.
 - Taking it to the point where you have proven that it works in a controlled and relevant environment.

New Technology Reporting and Patent Tracking System Enhancements

- ✓ HR Validation
- ✓ Project and Task Number Validation
- ✓ Security
- ✓ Repository and on-line access to legacy NTR's
- ✓ Integrated with NBS web toolkit page
- ? Integrate NASA Award checks with Payroll System

NTR Information Process Flow
